MONTHLY REPORT
APRIL 2021

Time to dip our toes!

Vaccinations are accelerating in the Nordics, Sweden alone will receive 3,4 million doses during May according to Nordea Bank. This means that a full opening of the economies is close and the travel and leisure sector will soon experience a long awaited demand boost. We have started dipping our toes into the space, selectively increasing our exposure.

/ COMMENT - APRIL /

Vinga added the Norwegian ferry operator Color Group during the month, a bond with an attractive 12% yield. Together with Hurtigruten, Vinga has an exposure of 7% to Travel & Lodging.

Earlier in April we added to Vinga's exposure in the Dutch gaming company Azerion. The gaming companies are structurally improving their credit quality in an impressive way and Azerion is now Vinga's largest holding after the Danish freight company Scan Transgroup.

FNG NORDIC AB (ELLOS)	5,48%	4,2%

/ OUTLOOK /

The macro backdrop is strong and it will likely improve further when the economies are opening up. There is a risk of overheating which could lead to higher interest rates and inflation. The present accelerating commodity prices and shortage of semiconductors are clear signs of this but we expect it to moderate as output increases. There is room for inflation to increase and the risk of overheating is still manageable, lets now enjoy the strong recovery.

The fund is actively managed, meaning that bonds are selected individually after a thorough analysis of each issuer and market. The fund invests primarily in bonds issued by Nordic companies and is suited for investors with a preferred investment horizon of 2-3 years.

While the main focus is corporate bonds in the high yield segment (with lower credit ratings), the fund can also invest in instruments with higher credit ratings ("investment grade") as well as in instruments without credit rating. At least 70 percent of the fund's capital must be invested in corporate bonds and the portfolio managers can use derivatives as part of the fund's investment mandate, as well as to reduce unwanted risk.

The objective of the fund is to achieve capital growth that, over a period of 3 years, exceeds the performance of the fund's benchmark index, OMRX T-BILL +2 percentage points per year.
